## **Features Key:**

**CLASSES:** Character Classes are six main combat classes, each with multiple elements that differ from the others.

**MODDERS:** You can change any character class' stats in several ways using mods that can be gained by applying skill points.

**BATTLE SYSTEM:** In the game, each character has two hit points, combining with attack and defense to make a "morale rating." If the character's morale rating is low, the chance of getting hit by the enemy increases, allowing for skillfully performed attacks on the enemy.

**GRAPHICS AND SOUND:**The graphics are high and detailed with great capacity to display many events at once. The sound effects also complement the action-orientated features of the game. (The full article can be found here.)

[NOTE: the feature descriptions have been taken directly from the jV site. The most important features (item collectability, additional multiplayer online features, and others) are not mentioned there. Also, please, NOTE that the article is quite long and contains quite a lot of interesting details. However, if you don't already know the game, it's not recommended you read the whole article right now. It would be better to wait a few weeks or so and then come back to this post or simply pop onto jV's website and read the review directly there. An example of this is you could read the single-player review first, then move on to the online multiplayer article, then come back here. Or just scroll here to the bottom and read the links provided. There are more detailed descriptions available at the jV web site.]
