Reviewed By: Date Submitted: Rating: 7.9 60 Recommend For: Anyone who wants an adventure game but likes their games more interactive. Pros: Its just like Gone Home, but not as long and youre limited to a single space. Cons: It is limited to one attic, but the space is huge, so its not that big of a deal.

Recommended PS4, Xbox One, PC (with Oculus Rift support) is a game that I think a lot of people will enjoy. It has a great story, some fun puzzles and has beautiful imagery. The only part that bugs me is the loading screens. 6.7

Crayon Kids Project Timelapse You simply do not see a lot of games this simple. You are in a house with your friend being recorded by a camera.

Through each room you go the camera stops and records with each room being sequenced and narrated. Its a fun way to spend a few minutes before you go to work or school. A fun game for preschoolers. 8.2 Crayon Kids Project Timelapse Review Im a parent and I like this game, not only because its made in Crayon Kids Studios, but because the storyline is pretty interesting. Its kind of like a kids version of Teletubbies. The images are neat and keep the kids attention. I give this game 4 of 5 cats. Pros: - All images are made using crayon

- Nice talking and narration. - The images are rendered really well. Cons: - Would like the game to be more interactive - Audio sometimes misses when talking - Sometimes images scroll too quickly for my eyes to track Gameplay Review Played this game on both my PS4 and PC. I'd say there are few to no real glitches. The story is great and it's pretty cool to see what you said with the camera. Also, the ending is great, it makes you feel warm and fuzzy. Pros: - Great story, beautiful environments, and nice lighting - Simple to pick up and play Cons: - The game has a few glitches that bugs the gameplay Similarity

search for protein dynamics using reduced-dimensional trajectory: a measure of transition consistency of proteins. We proposed an approach to the similarity search for protein dynamics using reduced-dimensional trajectory (RSTD). Given a time-series (a protein structure) and a time-series (a protein conformation), RSTD determines the time-series that is the least diss

If you enjoy the style of Nangarth, you'll love Necrolance. It's a very unique game that is sure to have you hooked, for good. Read More About Necrolance... Great tool, but the "device list" is missing on the main page. What will we have to do so that it becomes more visible? Daniel Dau Hello Patrick, We removed the device list. It's available on the topics page. Thank you for reading and for your feedback. Patrick Pietroski Hi Daniel! 1. It's still not there, and can't find it, 2. The last time I posted a comment there, it took forever for the answer, and in those long times between answers, the page was sitting at the same spot for over a minute. Surely you can do something about this, can't you? Patrick Pietroski Daniel Dau Hi Patrick, We will try to remove the page by adding it to the topics page. However we will certainly adjust the procedure. Thanks Patrick Pietroski The thing is, even if you do remove it, it's never hidden from view, it just was hidden, and that's not good enough, there should be an indication that there is a list of devices, and it should allow you to select and see it. Daniel Dau Hi Patrick, Can you please mail me an PM so that I can take a look at the website. Daniel Dau Hi Patrick, We removed the device list. It's available on the topics page. Thanks Patrick Pietroski Hmm... Patrick Pietroski Hello Daniel, thanks for the quick response! But I still have to say, you shouldn't hide stuff like that from the user, and you should not remove the list as it used to be on the main page, I still could not find it even after that "switch". It's a great tool that doesn't need to be hidden from the user, nor removed. Thanks Daniel Dau Hi Patrick, We removed the device list. It's available on the topics page. Thanks Daniel Dau
